Six hundred and fifty metres to the school gate.

Picture the ordinary Tuesday. That is the real test of an address.

Great land is not about a view from a brochure — it is about the drive you make two hundred times a year. Sri Sakthi Nagar Extension sits in Varadharajapuram, on the Mudichur side of Tambaram: schools, a college, two hospitals and the corporation office are all within a short radius, the toll plaza puts you on the highway in minutes, and GST Road, the bypass and Tambaram railway station tie you to the rest of Chennai.

“You are not buying distance to a landmark. You are buying back the minutes of every day.”

Distances are approximate road distances from the layout; scan the QR codes on the technical sheet for exact map pins.

Choose the plot that fits the life you are planning.

Every plot below is part of the same CMDA-approved layout: surveyed, numbered and sized on record. Green plots are available today. The gold arrow is the direction each plot faces; the figures beneath are its area and dimensions (width × depth).

Nothing reaches you until it has passed every check.

Land is the one purchase you should never have to take on trust. Before a plot is ever shown, its title is traced, the encumbrance certificate reviewed and the price benchmarked against comparable sales and guideline value — the same discipline a third-generation Chennai practice has applied for close to thirty years.

- ✓ **Title verification**
Ownership traced and confirmed.
- ✓ **Encumbrance certificate**
Charges and history reviewed end to end.
- ✓ **Statistical benchmarking**
Priced against comparable sales and guideline value.
- ✓ **Documentation & banking**
Registration and loans supported to completion.

Land in an approved layout is finite by definition: forty-seven plots were drawn, and no more will be added. Every plot you see on page 3 is a plot on record.
